EDUCATION

Nagindas Khandwala College
Bachelor of Science in Information Technology

Expected: March 2026

PROJECTS

ATS Automation Website

Technologies: HTML, Firebase, CSS

- ATS Automation is a cutting-edge automation and robotics company. I developed their official website to represent their services in industrial automation, showcasing their expertise through a clean UI, engaging animations, and user-centric design. Features include service highlights, contact integration, and a responsive layout for all devices.

Swami Vivekanand School Website

Technologies: HTML, CSS, JS, Firebase.

- ❖ This school website is designed for Swami Vivekanand Vidyalaya to provide an informative and engaging platform for students, parents, and teachers. Built with a modern UI and animated interface, it features an about section, faculty highlights, contact forms, and optimized layout for desktop and mobile devices.

BrightLant - Personal Brand

Technologies: HTML , CSS , JS , Firebase

- ❖ BrightLant is my personal software and web development brand. I built this website to showcase my services, portfolio, and expertise in building attractive websites and apps for clients. The site includes animated sections, contact forms, and a responsive layout that works across all devices.

EXPERIENCE

Intermediate MERN Developer

2025-Present

- ❖ Completed online courses on web development fundamentals. Developed and deployed my first web application using the MERN stack. Participated in coding challenges and competitions, enhancing problem-solving skills. Attended workshops and seminars on emerging technologies.

Management Assistant – Sure Success Tutorial

- ❖ Assisted in managing student batches, coordinating with faculty, and handling tech-based academic activities. Helped streamline class operations, track performance records, and improve student engagement through digital tools.
